

Got old paint? Or any other household hazardous waste such as automotive fluids, lawn and garden chemicals, bug sprays, cleaners and batteries? There are safe disposal options for both [Missouri](#) and [Kansas](#) residents. For more information on recycling, visit [RecycleSpot.org](#).

Large appliances can be recycled or donated for reuse depending on condition. Refrigerators, freezers and dehumidifiers contain a number of hazardous substances including refrigerants. Only recycle these appliances with businesses that have certified refrigerant removal technicians. For more information on recycling, visit [RecycleSpot.org](#).

You can recycle your plastic planting pots and trays curbside, at recycling centers, and at select home improvement stores and nurseries. Be sure to thoroughly rinse them before recycling. For more information on recycling, visit [RecycleSpot.org](#).

In the Kansas City metro area each one of us produces seven pounds of trash per day. Reduce your seven pounds by putting some [additional recyclable items](#) on your recycling list. For more information, visit [RecycleSpot.org](#)
